

CHANDRAPRAKASH C

+91 97864 75035 — chandraprakash.soc@gmail.com — Dindigul, Tamil Nadu — Open to Relocation (Hyderabad)
Portfolio — LinkedIn — GitHub — TryHackMe (Top 1%)

PROFESSIONAL SUMMARY

B.Sc. CS fresher targeting a **Junior SOC Analyst** role. Ranked **Top 1% globally on TryHackMe** (3M+ users) with **SOC Level 1 certification**, validating hands-on **SIEM monitoring, log analysis, threat intelligence, incident triage, and case documentation** competency. Operated a multi-VM SOC lab performing **initial alert identification, basic triage, and first-level validation** of security events (**phishing, malware, suspicious logins**) per **playbooks and SOPs**; escalated incidents to L1/L2 and raised **ITSM / case management tickets in Jira** with full incident documentation. Certified by **IBM** and **Google**. Available for rotational shifts including nights.

TECHNICAL SKILLS

SIEM & Log Analysis	Splunk (SPL, dashboards, alerts), Microsoft Sentinel, Windows Event Logs, Linux Syslog, system logs, Sysmon
Incident Response	Alert monitoring, triage, true/false positive classification, incident management, case management, playbooks & SOP-based response, L0→L1/L2 escalation, Jira ITSM ticketing, documentation & reporting
Threat Intelligence	IOC enrichment, threat intelligence, MITRE ATT&CK, VirusTotal, AbuseIPDB, Malware-Bazaar, Shodan, GSEC concepts
Network & Systems	TCP/IP, DNS, HTTP/S, ports & protocols, operating systems, Windows/Linux, system administration, IT support, endpoint security, antivirus, Wireshark, Zeek, Nmap, EDR (Velociraptor), firewall log analysis, Python, Bash, PowerShell, scripting, Shuffle SOAR
Core Strengths	Cybersecurity, Computer Science, analytical ability, analytical thinking, problem-solving, collaboration, thoroughness, accuracy, attention to detail, written communication
Security Foundations	CompTIA Security+ concepts, security systems, security monitoring, incident response, documentation, programming

EDUCATION

B.Sc. Computer Science	06/2023 – 05/2026
G.T.N Arts College, Dindigul (Madurai Kamaraj University)	CGPA: 8.01 / 10.0
HSC — Computer Science	05/2023
Government Higher Secondary School, Tiruppur, Tamil Nadu	68%

CERTIFICATIONS

• SOC Level 1 — TryHackMe	Verify	06/2026
• IBM Cybersecurity Analyst Professional Certificate — Coursera/IBM	Verify	06/2026
• Google Cybersecurity Professional Certificate — Coursera/Google	Verify	04/2025

PROJECTS & PROFESSIONAL EXPERIENCE

SOC Monitoring Lab — L0/L1 Analyst Simulation	GitHub
--	--------

Linux Mint · Ubuntu Server · Windows VM · Splunk · Wazuh · Zeek · Sysmon · Shuffle SOAR · Jira

- **Monitored** security alerts across **10+ attack scenarios** using **Splunk** and **Wazuh SIEM** dashboards; performed **initial alert identification and basic validation** per predefined guidelines, classifying each event as true/false positive and producing daily/weekly **security monitoring reports**.
- **Triaged** security events including **phishing, malware alerts, and suspicious logins** per MITRE ATT&CK-aligned **playbooks and SOPs**; escalated verified incidents to the **L1 queue**; raised **ITSM / case management tickets in Jira** with IOC timelines and asset details; dispatched stakeholder notifications for all ticket updates.
- **Investigated** endpoint/network behaviour via **Sysmon, Zeek, PowerShell logs, and Wireshark**; detected C2 beaconing (T1071) and scheduled-task persistence (T1053); automated IOC enrichment via **Shuffle SOAR** with **VirusTotal** and **AbuseIPDB** to reduce triage time.

ThreatLens — Threat Intelligence Aggregator	GitHub
--	--------

Python · FastAPI · VirusTotal · AbuseIPDB · AlienVault OTX · URLhaus · GreyNoise

- Engineered a multi-source **IOC enrichment platform** querying 5 threat intel APIs in parallel with MITRE ATT&CK-mapped risk scores, returning structured results in under 2 seconds to accelerate **L0 alert triage** and SOAR playbook integration.

SecOps Console — SOC Analyst Dashboard	GitHub
---	--------

React · Node.js · PostgreSQL · WebSockets

- **Developed** a SOC dashboard with real-time alert queues, incident tracking, L0→L1 escalation workflows, and audit-trail logging for incident documentation.
